Speakers:

- Anthony Cannon
  MSD, Switzerland
- Richard Denk
  SKAN, Switzerland
- Maik Guttzeit
  GEA, Germany
- Roland Koch
  Wilco, Switzerland
- Benoît Moreau
  GSK, Belgium
- Alexandra Stärk
  Novartis Pharma Stein, Switzerland
- Prof Evangelos Tsotsas
  University of Magdeburg, Germany
- Markus Wahlen
  GEA, Germany
- Dr Andrea Weiland-Waibel
  Explicat, Germany

Highlights

- Fundamentals of freeze drying
- Formulation development
- Process development
- Lyo-cycle development and improvement
- Scale-up and validation of freeze drying processes
- Freeze drying of highly potent and sensitive biological material
- Media Fill
- Lyophilizer in aseptic production lines
- 100% Inspection
- Workshops:
  - Fundamentals
  - Cycle development and scale-up to pilot/ commercial-scale freeze dryer
  - Computer simulation
  - Automated loading and unloading systems
  - Innovations

15 – 17 May 2018, Cologne, Germany

This course is recognised for the ECA GMP Certification Programme “Certified Technical Operations Manager”. Please find details at www.gmp-certification.eu
Lyophilization (or freeze drying) is one of the most exciting technologies in the pharmaceutical industry, although it is a very old process for the preservation of unstable materials. Trends are growing towards using non-aqueous systems.

Additionally, Process Analytical Technology (PAT) systems for in-line process monitoring are used to control and determine critical processing parameters.

Modern development following ICH Q8, Q9 and Q10 is based on the objective to design a lyophilization cycle applying a systematic and scientific approach instead of trial and error. Sufficient process understanding is essential to achieve a robust production process and efficient handling of post-approval changes (life cycle management) of a freeze drying process.

There is an increasing trend in aseptically produced lyophilized products, including peptides and proteins. Owing to the nature of these biological products, the lyo-cycle is more complicated and, in most cases, even longer than for other medicinal products.

The utility of lyophilization goes far beyond the vial. Principles of low temperature, low pressure can be applied to stabilize substances ranging from high potent APIs, novel medical devices, biologics and nanomaterials, freeze drying offers multiple opportunities.
Containment: Lyophilization of highly potent compounds
- Freeze dryer equipped with isolator
- An introduction to highly potent products
- Which are the critical limits and how are they evaluated?
- Correlation between critical limits and cleaning validation
- Determination of critical process steps
- Hardware solutions
- Examples

Lyophilization technology - design requirements and technical solutions
- Main components of a lyo (chamber, condenser, refrigeration skid, vacuum skid, shelves, etc.)
- Purpose of these components
- Design criteria of these components (temperature homogeneity, cooling and heating capacity, sublimation capacity and gas flow, etc.)

Lyophilizer in aseptic production lines - challenges and chances
- Loading and unloading of freeze dryers
- Lead times and campaigning
- Equipment characterizations
- FD cycles monitoring
- Vacuum and silicone oil leak tests
- Maintenance

Media Fill
- Media Fill Design
- Worst-case parameters for Media Fills
- Validation of lyophilization processes with Media Fills
- Requirements for Media Fills
- Actual trend with regards to Media Fills

How to organize a GMP-compliant lyophilization project
- Effective customer/supplier relation
- Definition of scope of supply (URS vs. supplier standard)
- Managing project organization and set up of controls
- Risk based life cycle approach in accordance with GAMP 5

Lyophilization cycle improvement and control by using mass spectroscopy
- Application of GEA LYOPLUS™ for verification of freeze drying batches
- Online data acquisition for monitoring the solution concentration in the freeze drying chamber
- Verification of freeze drying end points for primary and secondary drying
- Investigation of opportunity to use LYOPLUS™ as PAT tool during freeze drying cycles

Qualification/validation - to get the system tested
- Risk assessment in the context of qualification and validation
- QbD aspects for successful lyophilization projects
- Tests during qualification and validation
- IQ/OQ/PQ
- Concepts for reduced testing approach

100% Inspection
- 100% quality monitoring for continuous production process improvement illustrated with a lyo process application.
- Different inspections:
  - container closure integrity before and after the crimping process,
  - cake residual moisture evaluated by means of NIR spectroscopy, combined with product identification and cake defect detection,
  - downstream inline laser coding is clearly identifying the vial as a container which fully complies to all quality requirements.
On the third conference day, you will have the opportunity to take part in several parallel workshops. For that purpose, several lyophilizers will be available at GEA. Experienced GEA experts will lead you in small groups, providing an intensive experience and directly applicable know-how.

**Target group of the Course**

- **Hands on demonstration of production scale freeze dryer design and functions**
  This workshop will provide each participant with an overview of a state-of-the-art production-scale freeze drying system, including system configuration and controls.

- **Fundamentals of Freeze Drying, cycle development and scale-up**
  For effective freeze drying, each product requires a unique recipe (formulation); these formulations are initially developed on a laboratory or pilot-scale unit and it is imperative that formulation development takes both product characteristics and the limitations of pilot and production machines into account. This workshop will examine the procedures and consequences of process development and scale-up.

- **Live demonstration of automated loading and unloading systems**
  Demonstration of fully operative stationary and transfer cart system. Additionally, it will be possible to look at a multiple load/unload system with special features, including single row unloading and conveyance with clean-in-place functionality, and an isolator zone concept.

- **Workshop tour** including visit of shelf manufacturing area, freeze dryer testing as well as software development and simulation.

- **New Innovations in Freeze Drying Applications (for experts)**
  This workshop will highlight new innovations of production freeze dryer and includes processing highly potent products, vial track and trace and technologies for controlled nucleation.

A shuttle bus will bring you to Cologne Central Station at approximately 15.15 h. From Cologne Central Station, frequent airport connections are available.

It is highly recommended that you bring your own safety shoes, if available.

**Social Event**
In the evening of the first conference day, you are cordially invited to a social event. This is an excellent opportunity to share your experiences with colleagues from other companies in a relaxed atmosphere.

Participant’s comment on the 2017 Conference:
“Conference was top class, highly recommend.”
Prof. Michelle Donohoe, Endo Ventures, Ireland
Anthony J. Cannon, MSD, Switzerland
Tony is currently Regional Director of Global Technical Operations, External Manufacturing for Sterile Products at MSD International located in Lucerne, Switzerland. He is responsible for all technical support of sterile drug products external manufacturing operations for the European Region. He has held various positions throughout his career ranging from Drug Product development through commercial manufacturing with a focus on formulation and process development of both liquid and lyophilized parenterals, final container development and optimization, medical devices and drug delivery. He has 20 years’ in the industry with experience in biology, small molecules, medical devices, reagents, potent compounds, vaccines and cytotoxics, focused on lyophilization development and manufacturing. He has also presented on the fundamental of lyophilization, formulation, process development, thermal characterization, finished product analysis, and scale up and tech transfer at various conferences, seminars and pharmaceutical and biotech companies in North America, Europe and Asia.

Richard Denk, SKAN, Switzerland
Richard Denk is working at the company SKAN AG, headquartered in Allschwil in the position Head Sales Containment. Mr Denk founded 8 years ago the expert Containment group of the ISPE D/A/CH. The Containment Group published the Containment Manual Mr Denk was responsible for in September 2015. Mr Denk has spent nearly 20 years with the subject production of highly active / highly hazardous substances and has developed the containment pyramid.

Maik Guttzeit, GEA, Germany
Maik Guttzeit holds a Dipl.-Ing. degree in general process engineering. Maik is Team Leader Validation at GEA which provides customized GMP Lyophilizer systems. He is member of the GAMP® D-A-CH committee and also member of ASME BPE Subcommittee on System Design.

Roland Koch, Wilco, Switzerland
Roland Koch graduated as Electrical Engineer from Technical University in Basel, Switzerland. In 1994 he joined WILCO’s Controls department, responsible for all control system hardware. He started to build up the validation department and was responsible for the major projects in the pharmaceutical business. In 2002 he started his responsibility for the development of spectroscopic systems in house WILCO. Mr Roland Koch is Head of Development of New Technologies as well as Head of Validation.

Benoît Moreau, GSK, Belgium
Mr Moreau is a senior specialist Manufacturing Science and Technology for filling & freeze-drying operations at GSK Vaccines. He holds a Pharm.D. and a MS in Pharmaceutical Sciences form the University of Grenoble, France and has more than fifteen years of experience in the pharmaceutical sector. He has worked for different companies and managed activities such as parenterals and solid dosage forms production, design of freeze-drying cycle, process evaluation/validation and transfer of product towards different internal and external sites. Now he’s focusing on life cycle management of product and support operations in process improvements, troubleshooting, evaluation and implementation of new technology.

Alexandra Stärk, Novartis Pharma Stein AG, Switzerland
After studying Hygiene Technology at the Technical University of Albstadt-Sigmaringen, Alexandra Stärk has worked since 1995 at Novartis Pharma Stein AG and is now responsible for a team of microbiological experts in the department of Manufacturing, Science & Technology which defines the microbiological control strategies for sterile and non-sterile production on a global and local level.

Prof Evangelos Tsotsas, University of Magdeburg, Germany
Evangelos Tsotsas holds the Chair of Thermal Process Engineering at Otto von Guericke University Magdeburg, Germany, since 1994. His research concentrates on drying and on particle formulation processes related to drying (coating, granulation, agglomeration). He is the recipient of the Hosokawa Award for Innovation and the ProcessNet Award for Excellence in Drying Research. Chairman of the German Working Party on Drying, former Chairman of the European Working Party on Drying, and editor of the book series Modern Drying Technology (Wiley-VCH).

Markus Wahlen, GEA, Germany
Markus’ career at GEA started in 2008 when he initiated a cooperative education at the DHBW Mannheim. After obtaining the bachelor degree in engineering in 2011 he proceeded to work in the department of electrical engineering as a SCADA programmer. His position involved developing and realizing visualization concepts both for freeze dryers and automatic loading and unloading systems (ALUS™). He particularly specialized in the field of LYOPLUS™ systems, GEA’s solution for the application of mass spectroscopy in pharmaceutical freeze drying. At the end of 2016 Markus took up a new position in GEA’s department of product and innovation as product manager for LYOPLUS™.

Dr Andrea Weiland-Waibel, ExplicatPharma GmbH, Hohenbrunn, Germany
Andrea is a Pharmacist with a Ph.D. in Pharmaceutical Technology. She held several leadership positions within Pfizer, working as Project Manager in process technology and being responsible for technology transfer & process development. After joining IDEA AG, a biotechnology company based in Munich, Andrea Weiland held the position of Director Pharmaceutical Development. She is founder of Explicat Pharma GmbH and Managing Director since 2005. Hers and her team’s experience covers the development of biopharmaceuticals, development of lyoformulations and lyocycles, analytical development and related QA as well as regulatory issues. Regarding lyocycle development, Explicat Pharma cooperates with iQ-mobil applying TEMPRIS®, the TEMPerature Remote Interrogation System. Explicat Pharma has been assigned several projects involving the modern process validation approach, including lyocycle robustness tests.
Date
Tuesday, 15 May 2018, 12.30 to approx. 18.00 h,
(Registration and coffee/snack 12.00 – 12.30 h)
Wednesday, 16 May 2018, 08.30 to approx. 17.00 h
Thursday, 17 May 2018, 8.00 –14.30 h, 15.15 –20 h)

1. transfer from H+ Hotel Hürth-Köln to GEA
   (bus transfer will be provided)
2. approx. end of course
3. approx. arrival at Cologne Central Station
   (bus transfer will be provided)

Venue
H+ Hotel Hürth-Köln
Kreuzstr. 99 / Theresienhöhe
50354 Hürth, Germany
Phone +49 (0)2233 94400
Email koeln.huerth@h-hotels.com

Accommodation
CONCEPT has reserved a limited number of rooms in the conference hotel. You will receive a room reservation form when you have registered for the course. Reservation should be made directly with the hotel. Early reservation is recommended.

Conference language
The official conference language will be English.

Organization and Contact
ECA has entrusted Concept Heidelberg with the organization of this event.

CONCEPT HEIDELBERG
P.O. Box 10 17 64
D-69007 Heidelberg, Germany
Phone +49 (0) 62 21/84 44-0
Fax +49 (0) 62 21/84 44 34
info@concept-heidelberg.de
www.concept-heidelberg.de

For questions regarding content please contact:
Dr Andrea Kühn-Hebecker (Director Operations) at
+49-62 21/84 44 35, or per e-mail at
kuehn@concept-heidelberg.de.

For questions regarding reservation, hotel, organisation, etc.
please contact:
Mr Niklaus Thiel (Organisation Manager) at
+49-6221/84 44 43, or per e-mail at
thiel@concept-heidelberg.de

Registration
Via the attached reservation form, by e-mail or by fax message.
Or you register online at www.gmp-compliance.org.

In certain cases a participation in the workshop may not be possible due to competitive reasons.

Registration form (please complete in full)

Lyophilization 2018
15 - 17 May 2018, Cologne, Germany

First name, surname
Company
Department

Important: Please indicate your company’s VAT ID Number
Purchase Order No. (if applicable)

Street / P.O. Box
City Zip Code Country

Phone / Fax

E-mail (please fill in)

General terms and conditions
If you cannot attend the conference you have two options:
1. We are happy to welcome a substitute colleague at the conference.
2. If you have to cancel entirely we must charge the following processing fees:
   Cancellation within 1 week prior to the conference 100%
   Cancellation until 1 weeks prior to the conference 50%
   Cancellation until 2 weeks prior to the conference 10%

Important: This is a binding registration and absurd fees are due in case of cancellation or non-appearance. If you cannot take part, you have to inform us in writing.

The cancellation fees will then be calculated according to the point of time at which we receive your message.

In case you do not appear at the event without having informed us, you will have to pay the full registration fee, even if you have not made the payment yet. Only after we have received your payment, you are entitled to participate in the conference. (In case of payment, you will not be confirmed!! As of January 2012)

German law shall apply. Court of jurisdiction is Heidelberg.

Privacy Policy: By registering for this event, I accept the processing of my Personal Data. Concept Heidelberg will use my data for the processing of this order, for which I hereby declare to agree that my personal data is stored and processed. Concept Heidelberg will only send my information in relation with this order or similar ones. My personal data will not be disclosed to third parties (see also the privacy policy at http://www.gmp-compliance.org/eca/privacy.html). I note that I can ask for the modification, correction or deletion of my data at any time via the contact form on this website.
